Morgan's Seafood Complex, Redcliffe

The distinguished Morgan's Seafood Complex in Moreton Bay, Redcliffe has recently undergone a refurbishment of its Seafood Market and Seafood Take Away outlets. The upgrade not only incorporated a complete fit-out but also the introduction of new flooring and associated drainage.

For the wash down areas, the client sought a hygienic and durable drainage solution for the salt water environment. The system also needed to be robust enough to be regularly trafficked by fish laden trolleys

ACO's Modular 100, a grade 316 stainless steel interconnecting drainage system, was selected for the application. Its wearing edge was reinforced with a Solid Edge insert, for enhanced strength.
