

ACO Building Drainage

BrewDog Brewery Canal Winchester, OH

PROJECT PORTFOLIO

Product:

Building Drainage Custom Stainless Steel Trench Drain with HD ladder grates

Contractor:

Scott Matthews, Exxcell

After making a name for themselves as an alternative brewery in the United Kingdom, BrewDog opened a US location in Canal Winchester, OH last year. ACO assisted with design, flow rates, and layout of the run to create an efficient and cost effective solution. 500 linear feet of Custom Stainless Steel Trench Drain with heavy duty ladder grates were installed around brewing equipment and along the canning line.

ACO Stainless Steel Trench Drains are available in AISI 304 or AISI 316L grades of stainless steel, with longitudinal slopes ranging from 0.5% - 5%. The matching heavy duty ladder grates also ensure that a wide range of weight loads can pass over without issue.
